

GROWFORCE Cal Bor

NUTRITION

Tech Sheet

Growforce CalBor is a readily available form of nitrate-free Calcium and Boron, ideal for either foliar or soil-applied applications.

Features & Benefits

- Boron application with calcium ensures better uptake of calcium and its fixation in the cell wall to improve the shelf life of fruit
- Physically compatible with most agricultural chemicals, making it an ideal tank mix partner
- Boron helps in pollination, sugar movement, nucleic acid biosynthesis and lignification of shoots, especially in vines
- Important for improving fruit set and quality
- Contains physiologically ideal ratio of calcium and boron to promote fruit firmness and fruit growth
- Supplies calcium to the crops, especially in situations requiring minimal or no amounts of nitrate nitrogen, such as at fruiting

Applications & Use Rate

Use Rate:
1-2 qt/acre

Weight:
10.18 lb/gallon

Applications:
Foliar or
Soil-Applied

Guaranteed Analysis:

Calcium (Ca).....	3.0%
Boron (B).....	2.0%
