

GROWFORCE[®] Finisher

NUTRITION

Tech Sheet

Growforce Finisher offers an ideal supply of essential micronutrients, making it a top product for use during vegetative and reproductive stages to help maximize yield potential.

Features & Benefits

- Formulated with the three micronutrients most commonly found to be deficient in tissue testing (Zinc, Boron and Manganese)
- Key micronutrients for maximum fruit quality
- Creates healthy root systems for optimal nutrient access
- Pre-mixed ratios of specific essential nutrients
- EDTA Chelation helps keep nutrients from being “tied up” in the tank or in the soil
- Contains a Biological for enhanced nutrient uptake
- Zinc is crucial for auxin formation and protein and enzyme synthesis
- Manganese encourages photosynthesis and chlorophyll production
- Boron promotes cell division and moving sugars within the plant

Applications & Use Rate

Use Rate:
1-3 qt/acre

Applications:
In-Furrow,
w/Side Dress & Foliar

Guaranteed Analysis:

| | |
|------------------------------|-------|
| Boron (B)..... | 0.50% |
| Manganese Chelated (Mn)..... | 2.0% |
| Molybdenum (Mo)..... | 0.25% |
| Zinc Chelated (Zn)..... | 3.0% |
