

GROWFORCE[®] Nutriscreen

NUTRITION

Tech Sheet

Growforce Nutriscreen is an easy-mixing, dual-purpose product that utilizes Nano Technology to protect crops and fruit from Ultra-Violet and Infra-Red Radiation and be metabolized by the plant as foliar nutrition.

Features & Benefits

- The Calcium and Zinc components combine to block most UV rays
- The Magnesium boots chlorophyll production, increasing the plant's natural resistance to sunburn/scald
- Can be applied with a wide range of agricultural chemicals, reducing the need for extra spray passes
- Washes cleanly off of fruit
- Increases calcium levels in fruit and plant
- Elongates shelf life and improves overall fruit quality
- Pre-mixed in carefully controlled ratios so the crop receives the essential nutrients specific to its growth stage

Use Rates & Timing

Use Rates:

Foliar Fertilizer: 1-2 qt/A

Sunscreen: 3-4 qt/A

Weight:

13.9 lb/gallon

Timing:

As needed during excessive periods of sun radiation and temperature.

Active Ingredients:

Calcium(Ca).....	14.0%
Zinc (Zn).....	3.0%
Magnesium (Mg).....	3.0%
Nitrogen (N).....	3.0%
Boron (B).....	0.09%
