

PGR

Tech Sheet

Vigéo™ WT is a plant growth regulator (PGR) that can help improve the germination of seeds, plant emergence, root growth, seedling development and plant growth/development throughout the growing season.

Features & Benefits

- Contains a balanced formulation of the three key growth plant hormones: cytokinin, indole butyric acid (IBA) and gibberellic acid (GA)
- Its unique formulation keeps **Vigéo™ WT** shelf stable and maintains its hormonal balance
- Triggers faster and quicker emergence
- Builds bigger roots
- Helps turn on hormones needed to transport micronutrients like Zinc in the emergence process
- Helps optimize stand
- Can be used to initiate rapid regrowth

Cytokinin –

Promotes cell division, leading to larger roots and shoots.

IBA – Supports auxin production for enhanced germination and root development.

GA – promotes quicker germination and earlier emergence.

Applications & Use Rate

Use Rate:

2-8 oz/acre

Applications:

Seed Treatment,
In Furrow & Foliar

Active Ingredients:

Cytokinin (as kinetin).....	0.010%
Indole Butyric Acid.....	0.005%
Gibberellic Acid (A3).....	0.004%
Other Ingredients:.....	99.981%
Total:.....	100.000%
